Summary

Second-year B.Tech CSE student with hands-on experience in data analytics. Delivered actionable insights through exploratory data analysis and developed effective data visualizations. Engaged in hackathons and tech clubs, showcasing a passion for software development and new technologies.

Skills

- C
- C++
- Python
- HTML
- MySQL
- Data Visualization
- EDA
- Creative writing

Language

- English
- Malayalam
- Hindi

Extra Curricular

- Member, IEDC, Innovation & Entrepreneurship Dev. Centre, VAST.
- Participated in innovation activities, hackathons, and entrepreneurship events.
- Member, MuLearn Club. Collaborated with peers to explore emerging technologies and learning opportunities.

Education

B.Tech in Computer Science and Engineering (Ongoing)

Vidya Academy of Science and Technology, Thrissur
CGPA: 8.28
Minor (ECE): Cyber Physical Systems

ST.Aloysius Higher Secondary School Thrissur, KL

Certificate of Higher Education Science stream with Computer Science (PCM + CS)

Experience

Infosys

Feb 2026 - Apr 2026

Data Analytics Intern

- Performed exploratory data analysis on real-world datasets to extract actionable insights
- Developed data visualizations to communicate findings effectively to stakeholders
- Gained hands-on exposure to SQL and data handling tools in a professional environment
- Presented and submitted reports with data, producing summaries and flow charts to enhance presentations.

InAmigos

Sep 2025 - Oct 2025

Content Writer Intern

- Delivered high-quality written content that was insightful, informative and entertaining.
- Contributed to social media strategy, creating posts that enhanced audience interaction.

Projects

- **RoaSafe Analytics (Road Accidents EDA, DAX, Data Visualization):** Conducted EDA on road accident datasets to identify patterns and safety risk factors. Visualized findings using charts to derive meaningful insights.
- **Movie Ticket Booking System (Java, MySQL, JDBC, Swing):** Built a desktop booking app with seat-level management, cancellation, and booking history. Applied OOP concepts encapsulation, abstraction, inheritance, and composition.
- **Performance Analysis of Pipelined RISC-V Architectures (RISC-V, Ripes):** Simulated a 5-stage RISC-V pipeline to analyze data hazards and instruction flow. Compared CPI and IPC metrics across configurations with and without hazard detection.
- **Stroke Prediction System using Machine Learning (Python, Scikit-learn, Gradio):** Built a stroke risk prediction model using Random Forest Classifier on a real-world healthcare dataset, handling class imbalance with SMOTE to improve minority class detection. Developed an interactive web-based UI using Gradio, enabling users to input patient health data and receive real-time stroke risk predictions with probability scores.

Certifications

- Basics of Python, Infosys Springboard
- Python, IIT Bombay Spoken Tutorial
- C, IIT Bombay Spoken Tutorial
- HTML, IIT Bombay Spoken Tutorial
- Digital Skills 101 (30 hrs), NASSCOM
- NPTEL DBMS Certification
